

PRINTERS

With their increasing functionality and incomparable convenience, mobile phones – and, to a lesser extent, tablets – are taking over from the PC as a key business tool. They can now be used for almost anything that once required you to be at your desk in front of a screen. That's certainly true for corporate users and those in the public sector.

Take printing, for instance. Today's printers are routinely equipped with Wi-Fi capability, meaning that they can be not only located wherever is most convenient in an office, but can also readily be shared by any connected device. Beyond this, services like Google Cloud Print and Mopria connect printers to the web, making home and work printers available wherever you are. In an increasingly mobile business world, that flexibility is invaluable.

Sharing resources is particularly important in education, where budgets are tight. Wi-Fi allows printers to be conveniently located where they can be available to multiple students.

Add Bluetooth and NFC to Wi-Fi, and it's clear that printers have never been so accessible.

DID YOU KNOW?

THE WORLDWIDE MULTI-FUNCTION PRINTER MARKET WILL GROW AT A COMPOUND ANNUAL GROWTH RATE OF 2.15% BY REVENUE BETWEEN 2016 AND 2020.

THE ADOPTION OF WIRELESS PRINTERS IN THE IT SECTOR AND EDUCATIONAL INSTITUTES IS EXPECTED TO SPUR GROWTH IN THE MARKET WITH A COMPOUND ANNUAL GROWTH RATE OF MORE THAN 3% BY 2019.

Lexmark CX725DE
