

# SCANNERS

It is estimated that 6.8 million people in the United Kingdom are mobile workers, which is 22% of the 31.2m UK working population. Many - in both the private and public sector - no longer go to a place of work: rather, they are working from home or mobile, and that trend is forecast to increase. Mobility is, increasingly, a feature of our working lives - but many of us still need the tools we would use in the office.

An example is scanners. Despite the trend towards paperless communications, they're still invaluable for a host of applications. The advent of powerful, flexible, portable scanners means that photographs, invoices, manuals or magazine articles can be captured whether you're in a customer's office or on the move - to your Android or Apple phone perhaps, for emailing to a colleague. For schools and colleges, portable scanners can be invaluable in project work.

Meanwhile, office-based scanners benefit from the freedom, flexibility and cost-effectiveness of Wi-Fi technology, making them ideal for deployment in collaborative work spaces where space is at a premium and cable clutter needs to be minimised.

## DID YOU KNOW?

THE GLOBAL DOCUMENT SCANNER MARKET IS EXPECTED TO GROW AT A COMPOUND ANNUAL GROWTH RATE OF 14% BETWEEN 2016 AND 2020.

THE WORLDWIDE PORTABLE SCANNER MARKET WILL BE WORTH MORE THAN \$1,300 MILLION BY 2019.
