Why choose Huddly & Lenovo for Zoom Rooms?

Zoom Rooms are conference rooms designed for the hybrid team in the modern workspace. Using industry-leading video conferencing equipment from Huddly and Lenovo, team members both remote and in-office can connect and collaborate in real-time.

These purpose-built hardware solutions for Zoom Rooms ensure simplified installation and management for flawless meeting experiences. With Huddly's AI features, the award-winning cameras understand light conditions and automatically frame participants so everyone in the Zoom Room can be seen. Additionally, both the Huddly L1 and IQ can capture data such as meeting room usage, occupancy and people count. This information is integrated back into the Zoom dashboard – ideal for the agile office.

Ensuring that everyone can be seen and heard perfectly during video conferences is key. With the Lenovo ThinkSmart Bar, ThinkSmart Hub and ThinkSmart Core + Controller Kit, meetings couldn't be more efficient. Lenovo's ThinkSmart Hub allows users to start meetings on time, manage cables, communicate via voice, chat in real-time and share control with the rotatable display.

Meanwhile, the ThinkSmart Core + Controller Kit allows users to easily initiate and control meetings and collaborate securely with remote colleagues. It includes a computer powered by 11th Gen Intel® Core™ vPro™ processors with Intel® Iris® Xe graphics and a controller with an anti-glare and anti-fingerprint coating 10-point touch HD display.

Plus, the ThinkSmart Hub is backed by Lenovo's ThinkShield – the most comprehensive security solution on the market. Combining industry-leading secure hardware, services and processes, ThinkShield protects privacy and data, keeping collaboration in the Zoom Room secure.
