-  Palm detection - rejecting with the palm of the hand
-  Finger - Navigate
-  Pen tail - Erasing

### 5 Compatible with Various Accessories

### 6 Windows OPS Module

- Upgradeable Android OPS Module
- Windows OPS Module

# New AI functions on the MeetingBoard

Bring Intelligence to Every Meeting

## Video Fence

### What is that?

With the video area function, you can set up a virtual boundary to enclose people in a specific area.

### Why did we develop this function?

For example, if a meeting takes place in a meeting room with glass wall surrounded, people outside the meeting room may also be framed in as well. This function is intended to prevent such a situation.

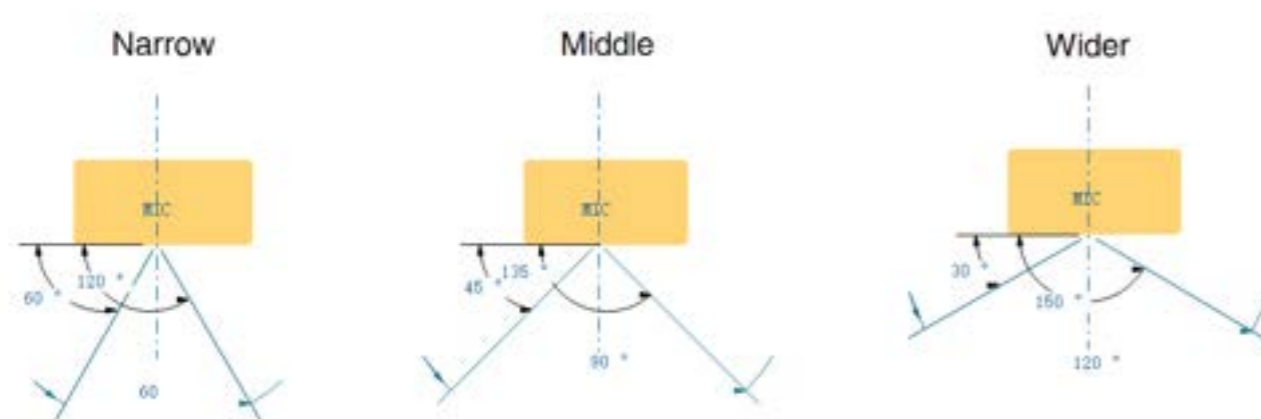

### How do you set up?

Device Settings > Camera > Advanced > Video Fence

**Note:** 1) While you set the video fence, auto-framing and speaker tracking will conduct people tracking based on the fence range you set;  
2) The green box means that the person is in the detection area. And the red box means that they are outside the detection area.

## Audio Fence

- **What is this?** You can use the audio fence function to change the range of the voice recording.
- **Why have we developed this function?** In an open meeting, the sound recorder may pick up voices from another direction that do not belong to it. The audio area function creates a virtual audio wall to limit the voice recording area.
- **How do you set it up?** The configuration is carried out via the web user interface.

## Device mode and content sharing

Bring your own meeting into the conference room with your laptop and enjoy the outstanding audio and video functions of the MeetingBoard:

- **Audio:** 12 meter voice pick-up range, noise suppression, reverberation suppression
- **Camera:** 4K, AI functions (auto-framing, speaker tracking, multi-focus framing, picture-in-picture, audio range, video range)
- **Content release:** Wireless Sharing Pod & VCH51

STANDARD SOLUTION

## Why MeetingBoard?

All-in-one MTR device with display and collaboration function

### Genuine all-in-one MTR product.

Clear, simple and professional MTR solution for every workplace.

### For all systems.

Supports Windows and Android systems simultaneously, switching between systems is possible without any problems.

### Powerful video and audio features.

New AI video function and powerful audio components provide a better meeting experience than any other meeting bar.

### Simple installation.

Follow the video tutorial to install the Yealink MeetingBoard and complete the room setup within 15 minutes.

### Absolutely mobile.

Thanks to the floorstand, the MeetingBoard can be easily moved from room to room.

## Cooperation, efficiency, cost reduction

### Promoting cooperation

- The Yealink MeetingBoard can be used for brainstorming, discussing and making decisions
- Supports whiteboard, notes, polls and more so team members can share ideas and opinions in real time with a perfect team video conferencing experience

### Increase efficiency

- Helps team members to focus on the main issues
- Use timers, agendas and more to organize your meetings
- Content can be exported and shared with the team

### Reduce costs

- Reduce paper consumption and cut meeting costs
- Travel costs can be reduced and team members can be more productive
- Longer service life and lower maintenance costs

# Proposed standard solution

### Small room

Brainstorming on a shared whiteboard.

MeetingBoard65 | CTP18 | Wireless Sharing Pod

How to use this playbook in the project

Try & Buy Program Available  
With Up to **70% Off List Price!**

The MeetingBoard screen displays a three-step process for the Try & Buy program. Each step is represented by a colored box on the left and a corresponding text block on the right. Step 1 is green, Step 2 is purple, and Step 3 is blue. The text for each step is as follows:

Step	Description
Step 1	Set the room size for the customer. Register the deal on the Yealink ORS portal ( <a href="https://ors.yealink.com">ors.yealink.com</a> ).
Step 2	Use the standard solution proposed and offer it to the end customer. Yealink Support POC. Request a special offer from the Yealink team or your dealer. Help the end customer book a demo and agree on joining Yealink Try & Buy Program to receive up to <b>70% Off</b> List Price!
Step 3	Watch the installation video tutorial on-site at the customer's premises Can't carry out the installation yourself? The Yealink OEM installation service is aimed at resellers. <b>Remote one on one session</b> is also available in the Try & Buy Program!
