

# PAPERCUT FOR COMMERCIAL BUSINESSES

Manage and control office printing

**PaperCut** is the solution if your customer wants to:-

- Securely print documents anywhere across their printers and MFD fleet
- Provide visibility of usage and costs to management
- Prevent unnecessary printing which ultimately affects their bottom line

## HELPING BUSINESSES GET A HANDLE ON PRINTING

**PaperCut** will help companies of all sizes to **reduce waste** and **save money for their business**. PaperCut MF works with **any fleet of MFPs, single or mixed brands**. It allows companies to set print rules and parameters, analyse where the highest costs are and manage/control print fleets more effectively. Able to include prints from BYOD and provide secure print release facility, it's totally geared up to providing **big savings** across the organisation.

### Printing Tracking

See who is printing what, when and where.

### Rules & Policies

Promote savings with duplex and B&W printing rules.

### Find-Me Printing

Print once and retrieve from the closest printer.

### Reports

Report on all printer activity by employee, function or location.

### User Tools

Keep staff printing responsibly with pop ups & reminders.

### BYOD

Print from iPads, tablets, smartphones or laptops.

"We have recently deployed PaperCut to raise awareness of both financial and environmental cost of printing amongst our users, and provide management with information that can be used for accurate recharging and making intelligent decisions about managing printing. I have been delighted with the ease of installation and configuration and the support provided during our evaluation stage. We were up and running in a few minutes...superb product backed up by a great support team. Simply brilliant."

**Anthony, UK Wealth Management Ltd, UK**
