

LG provides a plethora of high-quality displays for an array of applications and environments. To support Product Managers with increasing stock levels, we need the sales team to focus on three key products that address customer needs.

UH5 Series

When it comes to meeting rooms, it's important to have the right tech for the space. Over 80% of people believe that technology should make meetings easier and more productive. But the opposite occurs when screens are the incorrect size or poor quality. The UH5 Series is designed with user experience in mind and offers a range of screen sizes with a resolution that's 4x higher than FHD.

Key features:

- Wide range of sizes 43"-98"
- Clear View with Non-glare Coating 28%.
- Certified Crestron Connected® for high compatibility with professional AV controls to achieve seamless integration and automated control.

TR3PJ

Interactive displays offer exciting opportunities for educators to explore a huge range of options for teaching. The TR3DJ makes collaboration with students easier with up to 20 points of multi-touch, giving a lifelike and precise touch and writing experience.

Key features:

- ScreenShare Pro enables you to show up to six shared screens in real-time, compatible with Chromecast and Apple.
- Built-in speakers on both sides of the front bezel deliver a clear audio experience.
- Air Class supports connecting up to 30 students and offers interactive classes by using mobile devices.

XE4F

Outdoor displays must be able to handle varying weather conditions while demanding attention with eye-catching content. The XE4F series has a slim and robust design that can be installed with ease. Upgraded brightness ensures that content can still be seen under strong, direct sunlight.

Key features:

- 49"-55"
- IPS technology allows the screen to be viewed at nearly any angle.
- Waterproof and weatherproof design ideal for outdoor usage. IP56 Design, IK10 Protective Glass.
