

CAM230

Switch 1 of 3 USB/HDMI cameras to USB or HDMI

INOGENI

The CAM230 is a USB and HDMI multi-camera switcher that helps improve meeting equity in virtual meetings. With its easy-to-use camera switching capabilities and support for bidirectional audio with video bars, businesses can ensure that all meeting participants have equal opportunities to speak and contribute. Able to support whiteboard and document cameras, collaboration and productivity is taken to a higher level.

Key features

- 3 video sources (2x USB 3.0/2.0 and 1x HDMI) clean switcher into a single video flow
- Video output for CODECs, matrixes, monitors or laptops for BYOM settings
- Controllable by RS-232 and IP
- Instantly change camera and video configurations without interrupting the presentation
- Ideal for remote education, collaborative meetings, webinar and live-streaming
- Audio I/O via the Inogeni Control App
- Compatible with Barco ClickShare Conference
- Cost-effective, reliable, compact, robust and easy to install and connect

Applications

The CAM230 can be used for a wide variety of applications, helping presenters stay in their presentation flow by switching cameras.

Seminar rooms

The CAM230 is the perfect solution for lectures, offering optimal experiences for online collaboration and presentations. With the ability to switch between three different camera feeds, it allows presenters to maintain their flow by switching cameras hassle-free.

Meeting rooms

The CAM230 allows users to connect to multiple HDMI sources such as laptops, cameras and projectors commonly used in meeting rooms. This feature ensures seamless integration without the need for additional converters or adapters. The plug-and-play device means there is minimal setup so meetings can start efficiently.
